

GDC Technology

GDC manufactures the Espedeo Supra-5000, the world's first DCI-compliant all-in-one laser projection system classified Risk Group 2, safe for commercial mini-theaters and private home cinemas.

Projection Expo 2021-GDC Technology Booth Overview

Founded in 2006, Espedeo Holdings Limited ("Espedeo") is a global digital cinema display equipment and solutions provider. We offer the premium commercial cinema projectors, cinema 3D system equipment and after-sales support service.

We take special pride in the brand and protect your investment with superior customer service, warranties and technical support.

Our product development philosophy aims to strike a balance among quality, simplicity, innovation, and cost efficiency to help improve the motion picture and homeowners cinematic experience.

From engineers and software developers to product managers and a vast sales network, we employ hundreds of passionate people with 13 offices and 34 local service centers around the world.

Espedeo Supra-5000

Espedeo Supra-5000 RGB+ laser phosphor cinema projector. Perfect for boothless, no hush-box mini-theatre installations and a cinematic experience at home and at sea.

BEST OF SHOW WINNER

GDC Technology Espedeo Supra-5000 DCI-Compliant Laser Projector

There's nothing out there that's quite like GDC's Espedeo Supra-5000, a 5,000-lumen, 2K-resolution laser projector that distinguishes itself in both the cinema and high-end home theater worlds by coming equipped with all the internals to play the first-run, copy-protected Digital Cinema Initiative (DCI) packaged content hosted by your local movie theater. Along with achieving full DCI-P3 color gamut, the Supra-5000 is built on a compact chassis and designed for quiet operation (less than 35dbA) for mounting directly inside mini-theaters, screening rooms, yachts, or other confined spaces. It's all made possible by GDC's proprietary tech that integrates a DCI-compliant media server, integrated cinema processor, and DMD formatter board on one circuit card.

The Espedeo Supra-5000 RGB+ cinema projector is now entering home theatre market with the quietest, lightest and smallest DCI-compliant RGB+ laser phosphor projector. Espedeo Supra-5000 is a laser projector with media security and color approved by Hollywood studios. Supra-5000 received the prestigious 2020 Red Dot Award in the category of "TV and Home Entertainment" with its sophisticated technical features and design. Supra-5000 is a professional grade cinema projector that can be ceiling mounted with no hush-box. The design is perfect for private movie-theatre-like screening in mini-theaters, conference rooms, hotels, home theaters, yachts and other small venues.
