

Laser Projector Espedeo Supra

[← Back](#)

[↓ Download](#)

The Espedeo Supra is a commercial, cinema-quality, laser phosphor projector with 5,000 lumens. It can be used for private cinema installations in hotels, private residences, yachts and mini theatres. At less than 35 dB, the projector is extremely quiet. It doesn't require a projection booth and can be mounted on the ceiling without a hush box. The browser-based user interface enables remote access via a desktop PC, laptop or mobile device.

Statement by the Jury

Thanks to its sophisticated technical features, the Espedeo Supra opens up areas where professional projection had not been possible before.
